INTRODUCTION TO THE OWNER'S MANUAL

SEGA ENTERPRISES, LTD., supported by its high electronic technology of LSIs, microprocessors, etc. and a wealth of experience, has for more than 30 years been supplying various innovative and popular game machines to the world market. This OWNER'S manual is intended to provide detailed comments together with all the necessary information covering the operation in general of electronic assemblies, electromechanicals, servicing control, spare parts, etc. as regards the THUNDER BLADE ECONOMY UPRIGHT, a new SEGA product. The manual is intended for those who have knowledge of electricity and technical expertise especially in ICs, CRTs, microprocessors, etc. Carefully read so as to acquire sufficient knowledge before working on the machine. Should there be a malfunction, non-technical personnel should under no circumstances touch the interior system.

1. HANDLING PRECAUTIONS

When installing or inspecting, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.

- Be sure to turn the power off before working on the machine.
- To insert or pull out the plug quickly is dangerous.
- It is necessary to make sure that the power cord or the grounding wire is not exposed on the road, etc. in a manner so as to be dangerous. Make sure that grounding connections are made safely at the position where so specified.
- Do not use any fuse that does not meet the specified rating.
- Make complete connections for the IC board and other connectors. Insufficient insertion is very dangerous.

Also, for the IC board circuit inspections, only the logic tone is allowed. The use of a tester is not permitted, so be careful in this regard. After confirming that there are no irregularities, turn the power ON.

2. PREVENTION OF COUNTERFEITING AND CONVERSION LABELLING

To prevent counterfeits and conversions, the following labels are put on all the SEGA products. When handling such goods, be sure to confirm the labels. They are used to prevent illegal acts such as the unauthorized copying of the products and the printed circuit boards thereof or carrying on business by manufacturing similar merchandise or by converting, selling or using such products or printed circuit boards.

ORIGINAL SEAL

The following seal is put on the kits, such as the printed circuit boards SEGA products.

LICENSE SEAL

The following seal is put on the machines manufactured by SEGA.

COPYRIGHT NOTICE

This SEGA product has the copyright notice as follows:

This signifies that this work was disclosed in 1987 and is the property of SEGA ENTERPRISES, LTD.

3. PRECAUTIONS CONCERNING THE PLACE OF INSTALLATION

The THUNDER BLADE ECONOMY UPRIGHT is an indoor game machine. Absolutely do not install it outside. Even indoors, avoid installing in places mentioned below so as to ensure proper usage:

- Places subject to rain or water leakage, or condensation due to humidity.
- In the proximity of an indoor swimming pool and/or shower.
- Places subject to direct sunlight.
- Places subject to heat sources from heating units, etc., or hot air.
- Vicinity of highly inflammable/volatile chemicals or hazardous matter.
- Sloped surfaces.
- Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
- Places subject to any type of violent impact.
- Dusty places.

4. NAME OF PARTS ①

TOOLS

(TAMPERPROOF WRENCH)

M4 540-0006-01
M5 540-0007-01
M6 540-0015-01

(TAMPERPROOF DRIVER)

M4 540-0018
M5 540-0017
M8 540-0011

4. NAME OF PARTS ②

5. SERVICE SWITCH FUNCTION

The layout as shown below can be viewed by opening the coin chute door.

INSTRUCTIONS

- ① SERVICE SWITCHUsed for the purpose of servicing and increasing the credits without registering on the meter (this allows you to check the game).
- ② TEST SWITCHFor operating this switch, see SELF-TEST.
- ③ VOLUME ADJUSTMENT

6. IC BOARD

Open the back door of the cabinet, and take off the shield plate to perform game board maintenance.

7. OPENING THE CONTROL UNIT AND ADJUSTMENT

1. OPENING THE CONTROL UNIT

The CONTROL UNIT can be manually opened towards you by taking off the 4 (M6) TAMPERPROOF SCREWS in front of the control panel, and the 2 (M5) TAMPERPROOF SCREWS, one on each side.

2. HANDLE & THROTTLE UNIT ADJUSTMENT

In the test mode, cause the **DIAGNOSTIC INPUT DISPLAY** to appear on the screen (to select it, push the test switch and move the handle upward and downward).

- ① To make vertical adjustments, maintain the handle unit's inclination in relation to the control panel as it was originally positioned, loosen the 2 screws of GEAR "A" and then refasten when the monitor display shows 80H+4H.

7CH, 7DH, 7EH, 7FH **80H**, 81H, 82H, 83H, 84H

To make backlash adjustments, loosen the VR "A" BRACKET and move it upward and downward.

- ② For horizontal adjustments, loosen the 2 "B" SCREWS on GEAR "B" and refasten them when the value is within the above allowable range of $80\text{Hz} \pm 4\text{H}$, with the hand grip positioned in the center.

Make backlash adjustments by loosening the VR "B" BRACKET.

Volume value setting 80 over (LEFT), 50 under (RIGHT)

- ③ With the THROTTLE LEVER in the neutral position, loosen the 2 SCREWS, manually turn GEAR "C" and make adjustments within the allowable range of $80\text{H} \pm 4\text{H}$

Make backlash adjustments by loosening SCREW "D."

Volume value setting
COH over (FAST), 40H under (SLOW).

9. DIP SWITCH SETTING

11. SELF-TEST

This test mainly checks the operation of game PCB's discovers defects if any, and also checks monitor colors and audio quality. In addition, the test indicates DIP SW assignment and has a Bookkeeping function.

TEST PROGRAM

- | | | |
|-----|------------------------|---|
| (1) | Memory Test: | Checks the EPROM programs and RAM Area. |
| (2) | Input Test: | Tests the operation of COIN, CANNON, MISSILE, SERVICE switches, etc. |
| (3) | Output Test: | Tests the operation of each lamp. |
| (4) | Sound Test: | Checks the quality of the synthesized sound transmitted from the PCB. |
| (5) | CRT Test: | Checks colors displayed. |
| (6) | Dip Switch Assignment: | Indicates dip switch assignments. |
| (7) | Bookkeeping: | Indicates data on average score and play time. |
| (8) | Backup RAM Clear: | Clears Bookkeeping memory. |

1. TEST OPERATION

- (1) Push the TEST SW button to display the test menu (Fig. 1).
- (2) Move the lever upward or downward and bring the arrow to the desired position.
Press the TEST SW button again to display the desired test
- (3) When each test is finished, press the TEST SW button again to display the test menu (Fig. 1). To end the test program, bring the arrow to EXIT and push the TEST SW button.

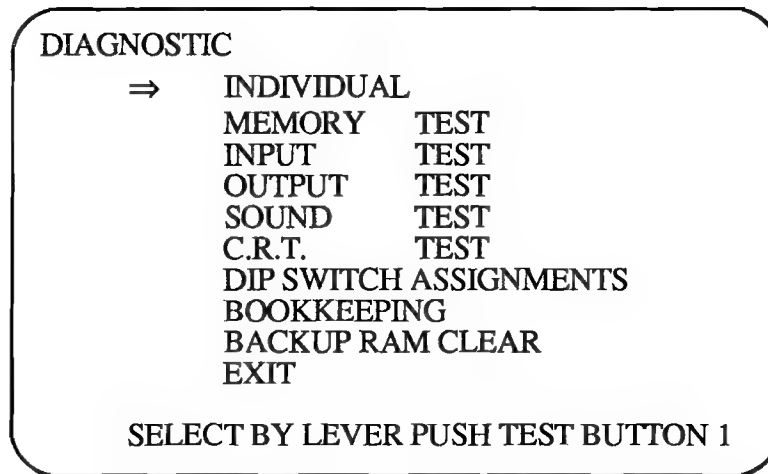

FIG. 1

- * INDIVIDUAL and CONTINUE can be selected by pushing the start button when the arrow is at the top position.

INDIVIDUAL: Indicates only the item which the arrow points to. Push the TEST SW button again to display the test menu (Fig. 1).

CONTINUE: After displaying the item which the arrow points to, push the TEST SW button again to proceed to the following test in the order as indicated in the Fig. 1 test menu.

2. TEST ITEMS AND DESCRIPTION

(1) MEMORY TEST

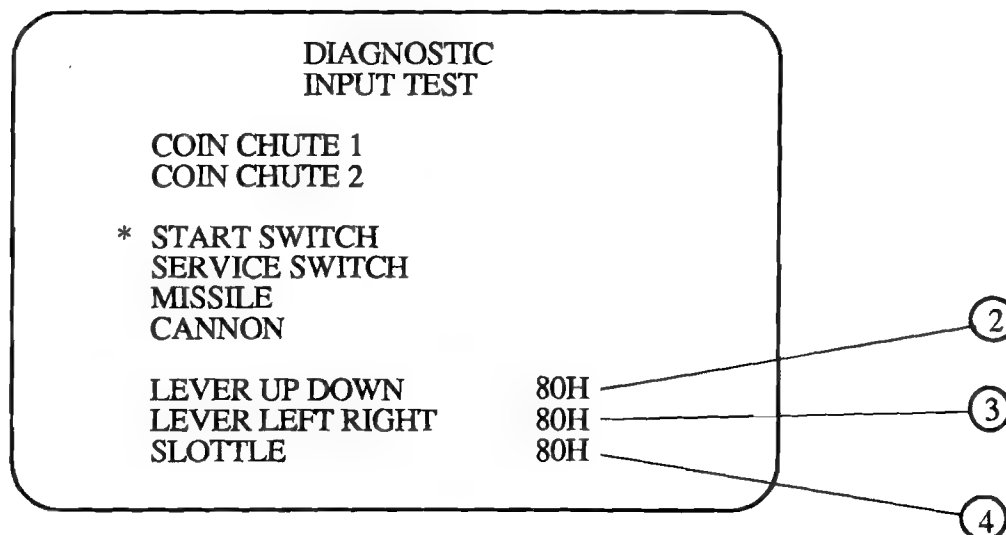

DIAGNOSTIC					
MEMORY TEST					
** ROMS TEST **					
IC. 20	GOOD	IC. 29	GOOD	IC. 57	GOOD
IC. 21	GOOD	IC. 30	GOOD	IC. 58	GOOD

CUSTOM IC TEST					
IC. 37	GOOD	IC. 41	GOOD	IC. 53	GOOD
IC. 107	GOOD	IC. 108	GOOD		

Checks the game PCB's 8 main ROMs, 18 RAMs and 5 CUSTOM IC's.

GOOD means the IC is in "GOOD" operating condition.

If there exists any malfunctioning of the ICs, "BAD" will be indicated.

(2) INPUT TEST

- ① Operate each switch. When the "OFF" condition is changed to "ON", the corresponding switch is in good working order.
- ② Data values should increase when the handle grip is moved upward, decrease when it is moved downward, and indicate 80 (± 4) H when released.
- ③ Data values should increase when the handle grip is moved to the right, decrease when it is moved to the left, and indicate 80 (± 4) H when released.
- ④ Data value should increase when the throttle lever is moved backward, decrease when it is moved forward, and indicate 80 (± 4) H when released.

(3) OUTPUT TEST

Each lamp will flash if it is working properly.

DIAGNOSTIC
OUTPUT TEST
*START LAMP

(4) SOUND TEST

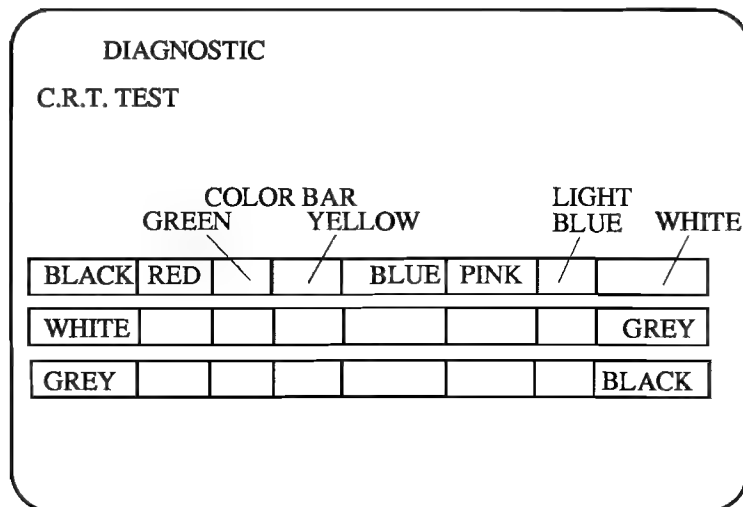

When the test has been completed, push CANNON button.

DIAGNOSTIC
SOUND TEST
SOUND NUMBER 0

PUSH CANNON BUTTON

(5) C.R.T. TEST

- 1 Checks the C.R.T. position. Make sure that the on-screen corners are consistent, and then make size adjustments.
- 2 Color check.

(6) DIP SWITCH ASSIGNMENTS

DIAGNOSTIC
